DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

Specification

2. The abstract of the disclosure is objected to because in line 1, ``is provided'' is a phrase which can be implied and should not be used in the abstract. Correction is required. See MPEP § 608.01(b).

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the

Art Unit: 1732

art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gillespie et al (U.S. Patent 5,783,503) in combination with Geus et al (U.S. Patent 5,814,349).

Gillespie et al (see the entire document, in particular, note col. 1, lines 8-16; col. 3, lines 17-42; col. 4, line 66 to col. 5, line 24; col. 8, line 8 to col. 10, line 18; Figure 4) teach a process of, and apparatus for, making a spunbond nonwoven fabric as set forth in the instant claims (note also the incorporation by reference of Hills, U.S. Patent 5,162,074), except for the aspect of independently controllable blowers, which is taught by Geus et al (see the entire document, in particular, note col. 1, lines 6-13; col. 2, lines 31-58; col. 5, line 18 to col. 6, line 32; Figure 1) and would have been obvious

Art Unit: 1732

to one of ordinary skill in the art at the time the invention was made Gillespie et al in view of Geus et al principally in order to provide varied operating conditions of the apparatus to accommodate a large variety of materials to produce a wide range of products.
